

Press Release

Stockholm, March 2<sup>nd</sup>, 2022

## **Ex-Change Parts AB in an agreement to purchase EC/H225 Super Puma surplus inventory**

Ex-Change Parts AB has finalised an agreement with one of the world's largest Helicopter operator, which facilitates Ex-Change Parts AB's purchase of the operator's worldwide surplus EC225 Super Puma stock inventory. The EC225, now renamed as the H225, is the latest member of the Airbus Helicopters' Super Puma family, which the operator had up to 20 EC225 in their fleet. This purchase will include more than 10 000 EC225 line items, equivalent to four 40-foot containers of inventories, including but not limited to mission equipment, rotor blades, components, engine parts, spare parts, and consumables.

Göran Enström, Business Development Manager at Ex-Change Parts AB says: "As the world's market leader in AS332Mk1 and AS332L2 spares and components distribution, we take the next natural step in expanding our parts distribution support into the next generation of Super Puma platforms with this purchase of EC225 Super Puma surplus inventory. This purchase not only complements our recent part-out projects on the same platform, it also complements the natural progression of our organisation's strategy, with the EC225 Super Puma platform as the core strategic focus."

Logistics of the purchased inventory are currently in progress, with the final shipment estimated to arrive in Ex-Change Parts AB's facilities by end of March 2022. Please feel free to reach out to any of Ex-Change Parts AB's representatives for more information. Ex-Change Parts AB will also be participating in the HAI HELI EXPO 2022 in Dallas this year and our representatives will be happy to meet and address any enquires there.
